Index Risk Analysis (time period from 6/30/2020 to 6/30/2021)

	Bloomberg Commodity Index	S&P 500	Bloomberg Barclays US Agg Index
Annual return	45.61%	40.79%	-0.33%
Annualized Volatility ¹	21.29%	10.98%	3.63%
Beta ²	0.6	1	0.33
Sharpe Ratio ³	1.919	3.282	-1.400

Index Correlation Matrix (time period from 6/30/2020 to 6/30/2021)

	Bloomberg Commodity Index	S&P 500	Bloomberg Barclays US Agg Index
Bloomberg Commodity Index	1.0000	0.4830	-0.0120
S&P 500	0.4830	1.0000	0.4830
Bloomberg Barclays US Agg Index	-0.0120	-0.0570	1.0000

Correlation is the extent to which the values of two indices have historically moved in tandem with one another, measured on a scale of -1 to +1. Perfect positive correlation (+1) means that as one index increases or decreases, the other index moves lockstep in the same direction. A correlation of -1 means the two indices move in exactly inverse directions.

Fund Performance and Index History (as of 6/30/2021)

	QTR	1Y*	3Y*	5Y*	10Y*	Since fund inception

The inception date for the Bloomberg Commodities Index is 07/14/1998.

Performance represents past performance; current returns may be lower or higher. Past performance does not guarantee future results. The investment return and principal value will fluctuate so that an investor's shares, when redeemed may be worth more or less than the original cost. All returns reflect reinvested dividends and capital gains distributions, but do not reflect the deduction of taxes that an investor would pay on distributions or redemptions. To obtain performance through the most recent month end, call 1-844-383-7289.

Market price returns reflect the midpoint of the bid/ask spread as of the close of trading on the exchange where Fund shares are listed. Market price returns do not represent the returns you would receive if you traded shares at other times.

* Annualized Returns

Fund objective

The Aberdeen Standard Bloomberg All Commodity Strategy K-1 Free ETF (the "Fund") seeks to provide total return through actively managed exposure to the Bloomberg Commodity Index Total ReturnSM (the "Index").

Index Facts

Bloomberg Code	BCOMTR
----------------	--------

Index description

The Bloomberg Commodity Index (BCOM) consists of 23 commodities which are weighted 2/3 by trading volume and 1/3 world production with an additional criteria of global economic significance. Weight caps are also applied to limit concentration in a particular sector (33%).

The Fund seeks to provide total return through actively managed exposure to the Bloomberg Commodity Index Total ReturnSM (the "Index"). The Fund is not an index tracking exchange traded fund and is not required to invest in all components of the Index. However, the Fund will generally seek to hold similar interests to those included in the Index and will seek exposure to many of the commodities included in the Index under the same futures rolling schedule as the Index. The Fund will exercise its active discretion in the utilization of this collateral (i.e., at least 75% of the Fund's total assets) and will principally invest in short-term investment grade fixed-income securities that include US Government securities, money market instruments and cash and other cash equivalents. Up to 25% of the Fund's total assets may be invested in a wholly-owned subsidiary organized under the laws of the Cayman Islands as a means to provide investment returns that are highly correlated to those of the Index. This subsidiary may also invest directly in commodity-linked instruments, including pooled investment vehicles, swaps and exchange-traded options on futures contracts.

¹ Volatility is a statistical measure of the dispersion of historical returns. A higher volatility is the result of large variations in the historical index returns.

² Beta is a measure of the volatility, or systematic risk, of a security or a portfolio in comparison to the market as a whole.

³ Sharpe ratio is a way to examine the performance of an investment by adjusting for risk. A higher Sharpe ratio indicates a greater historical risk-adjusted performance.

⁴ Aberdeen Standard Investments ETFs Advisors LLC (the "Advisor") has contractually agreed to waive the management fees that it receives from the Fund in an amount equal to the management fee paid to the Advisor by the Subsidiary. This undertaking will continue in effect for at least one year from the date of the Aberdeen Standard Investments ETFs prospectus, and for so long as the Fund invests in the Subsidiary, and may be terminated only with the approval of the Fund's Board of Trustees.

Important Risks

An investor should consider the investment objectives, risks, charges and expenses of the ETFs carefully before investing. To obtain a prospectus containing this and other important information, call 1-844-383-7289 or visit <https://www.aberdeenstandardetfs.us>. Read the prospectus carefully before investing.

Fund Risk There are risks associated with investing including possible loss of principal. Commodities generally are volatile and are not suitable for all investors. There can be no assurance that the Fund's investment objective will be met at any time. The commodities markets and the prices of various commodities may fluctuate widely based on a variety of factors. Because the Fund's performance is linked to the performance of highly volatile commodities, investors should consider purchasing shares of the Fund only as part of an overall diversified portfolio and should be willing to assume the risks of potentially significant fluctuations in the value of the Fund.

Actively managed ETFs do not necessarily seek to replicate the performance of a specified index. Actively managed ETFs are subject to risks similar to stocks, including those related to short selling and margin maintenance. The Fund's return may not match the return of the index.

Through holding of futures, options and options on futures contracts, the Fund may be exposed to (i) losses from margin deposits in the case of bankruptcy of the relevant broker, and (ii) a risk that the relevant position cannot be close out when required at its fundamental value. In pursuing its investment strategy, particularly when rolling futures contracts, the Fund may engage in frequent trading of its portfolio of securities, resulting in a high portfolio turnover rate.

As a "non-diversified" fund, the Fund may hold a smaller number of portfolio securities than many other funds. To the extent the Fund invests in a relatively small number of issuers, a decline in the market value of a particular security held by the Fund may affect its value more than if it invested in a larger number of issuers. The value of Shares may be more volatile than the values of shares of more diversified funds.

During situations where the cost of any futures contracts for delivery on dates further in the future is higher than those for delivery closer in time, the value of the Fund holding such contracts will decrease over time unless the spot price of that contract increases by the same rate as the rate of the variation in the price of the futures contract. The rate of variation could be quite significant and last for an indeterminate period of time, reducing the value of the Fund.

Changes in the laws of the United States and/or the Cayman Islands, under which the Fund and the Subsidiary are organized, respectively, could result in the inability of the Subsidiary to operate as intended and could negatively affect the Fund and its shareholders.

To the extent the Fund is exposed directly or indirectly to leverage (through investments in commodities futures contracts) the value of that Fund may be more volatile than if no leverage were present.

In order to qualify for the favorable U.S. federal income tax treatment accorded to a regulated investment company ("RIC"), the Fund must derive at least 90% of its gross income in each taxable year from certain categories of income ("qualifying income") and must satisfy certain asset diversification requirements. Certain of the Fund's investments will not generate income that is qualifying income. The Fund intends to hold such commodity-related investments indirectly, through the Subsidiary. The Fund believes that income from the Subsidiary will be qualifying income because it expects that the Subsidiary will make annual distributions of its earnings and profits. However, there can be no certainty in this regard, as the Fund has not sought or received an opinion of counsel confirming that the Subsidiary's operations and resulting distributions would produce qualifying income for the Fund. If the Fund were to fail to meet the qualifying income test or asset diversification requirements and fail to qualify as a RIC, it would be taxed in the same manner as an ordinary corporation, and distributions to its shareholders would not be deductible by the Fund in computing its taxable income.

Shares in the Trust are not FDIC insured and may lose value and have no bank guarantee. Investor shares are bought and sold at market price (not NAV) and are not individually redeemed from the Fund. Ordinary brokerage commissions apply.

Please see the current prospectus, [aberdeenstandardetfs.us](https://www.aberdeenstandardetfs.us) for more information regarding the risk associated with an investment in the Funds.

The S&P 500 Index is a capitalization-weighted index of 500 stocks selected by the Standard & Poor's Index Committee designed to represent the performance of the leading industries in the U.S. economy.

The Bloomberg Barclays US Aggregate Bond Index is a broad-based flagship benchmark that measures the investment grade, US dollar-denominated, fixed-rate taxable bond market. The index includes Treasuries, government-related and corporate securities, mortgage backed securities, agency fixed-rate and hybrid adjustable rate mortgage pass-through, asset backed securities and commercial mortgage backed securities (agency and non-agency).

The Bloomberg Commodity Index (BCOM) consists of 23 commodities which are weighted 2/3 by trading volume and 1/3 world production with an additional criteria of global economic significance. Weight caps are also applied to limit concentration in a particular sector (33%).
