02 Australia’s ageing population supports the need for a reliable income solution

- Increased life expectancy, market uncertainty and low interest rates pose challenges for retirees
- A predictable and stable income stream can help retirees meet their everyday living expenses
- Substitute your salary with this Fund as you move into retirement

03 No longer can retirees rely on traditional sources of interest rates for income

- Traditional income strategies won’t work in the current environment where interest rates are at record lows
- This Fund has the flexibility to capitalise on market opportunities by altering asset allocation through time. We can lean into growth assets when income opportunities are ripe
- Tax effectiveness can help maximise income

04 This Fund should suit investors who are looking to:

- Prioritise regular, consistent, tax-efficient income and long-term growth to mitigate the effects of inflation, while considering risk
- Receive a monthly income payment, set in advance
- Generally have immediate access to their capital in an emergency, unlike a term deposit which ties in investors for a fixed period and likely has an exit penalty payable upon early redemption
- Diversify an existing income arrangement

The abrdn Multi-Asset Income Fund is focused on paying a consistent monthly income while aiming to mitigate the effects of inflation.
