Why should I invest in the MyFolio Multi-Manager Funds?

We designed the MyFolio Multi-Manager Funds to make investing quick and easy. You simply decide how much risk you are comfortable taking and select the appropriate fund. We then do the rest to manage it in line with your chosen level of risk.

Our experts will:

Decide what to invest in and when

Actively manage the fund to try and produce the best possible return

Regularly check the fund is still in line with your chosen risk level

You can be assured that your investment is being managed by experts to help support your long-term investment goals. We do recommend that you regularly review your chosen fund to make sure it is still right for

you and your appetite for risk hasn't changed. Please remember that the value of investments can go down as well as up, and could be worth less than you paid in.

Deciding which fund is right for you is very straightforward. Simply decide how much risk you are willing to take.

Investor guide

What does MyFolio Multi-Manager invest in?

Our experts invest in what we believe to be some of the best available funds from leading asset managers across the globe, combining defensive and growth asset classes. Defensive assets are usually seen as less risky, including funds that typically hold investments such as cash and bonds. Meanwhile, growth assets are usually seen as more risky, including funds that typically

hold investments such as company shares and property. By combining different types of investment, we believe we can achieve the best possible return for each risk level.

Defensive

Growth

As you move up the risk levels, you would typically expect to see a higher proportion of the portfolio invested in growth assets and less in defensive assets.
