ASI Europe ex UK Equity Fund

01 Focused on high quality companies

High quality companies can offer an attractive combination of upside capture and downside protection. Emphasis on powerful structural growth trends supports robust corporate performance through varied economic conditions, while balance sheet strength, better environmental, social and governance (ESG) risk management, and high predictability of earnings lend resilience.

02 A truly active approach

The fund is a concentrated best ideas portfolio of 25–40 holdings reflecting disciplined application of a highly selective strategy.

Genuine differentiation versus benchmark and peers creates potential for meaningful outperformance.

03 Extensive research capabilities

Exceptionally well-resourced, experienced, and dynamic 14-strong European team leveraging a global proprietary research platform.

Sector specialist analysts with dynamic coverage of the entire market and deep company-level understanding drive idea generation.

A culture of collaboration through rigorous team debate strengthens investment ideas and builds conviction.

04 ESG at the heart of our investment process

Robust ESG assessment and proactive corporate engagement helps mitigate risk and enhances returns, with dedicated on-desk ESG resource in addition to an expert central ESG team providing global thematic perspectives.

05 A perfect market for bottom up stock pickers

Europe is a deep, complex, and often misunderstood market. Top down over-simplification of a region formed of many countries, political systems and cultures creates mispriced opportunities – rewarding experienced, active investors with deep analytical capabilities.

Important Information

This communication is for Investment Professionals only and should not be distributed or relied upon by retail clients.

- The value of investments and the income from them can go down as well as up and investors may get back less than the amount invested. Past performance is not a guide to future results.
- The use of derivatives carries the risk of reduced liquidity, substantial loss and increased volatility in adverse market conditions, such as failure amongst market participants. The use of derivatives may result in the fund being leveraged (where market exposure and thus the potential for loss by the fund exceeds the amount it has invested) and in these market conditions the effect of leverage will be to magnify losses.
- The fund invests in equity and equity related securities. These are sensitive to variations in the stock markets which can be volatile and change substantially in short periods of time.
- More details of the risks applicable to this fund can be found in the Key Investor Information Document (KIID) and Prospectus, both of which are available on request or at our website **abrdn.com**.
