

Conventional

Managed Portfolio Service - Portfolio 1

Monthly Investment Strategy - October 2021

This document is issued by the discretionary investment management area of abrdn, which has a separate legal entity, abrdn Capital Limited.

The Conventional Managed Portfolio Service (MPS) - Portfolio 1 is designed to provide an income focused return over the longer term. The Portfolio is designed to be appropriate for investors with a very low attitude to risk, who are seeking an income. The potential for capital growth may be limited.

Key Facts

Expected Risk (volatility): 3.0 - 5.5%

Our MPS risk scale:

Risk profile

The investment strategy for Portfolio 1 seeks to provide an income – the potential for capital growth may be limited.

It's likely to be suitable for clients who are prepared to accept a very low level of risk during the term of their investment. This portfolio could apply to clients who would like their investments to grow by more than they would in a deposit account over the long term, but also want to minimise the possibility of their investments falling in value. Under normal circumstances, they would prefer to avoid swings in the value of their portfolio.

This remains an investment management service, and there is risk involved in this portfolio. A secure cash product may be more appropriate for the most conservative clients.

Remember, investors could get back less than they invested.

- Suitable for investors with basic investment knowledge.
- Suitable for investors wanting to preserve capital.
- Suitable for investors seeking to grow their assets and generate income, over a period of at least 5 years, with easy access to their cash.
- Suitable for investors who are looking to invest in a standalone portfolio.
- Only suitable for clients who have received a recommendation from an adviser.

Investment strategy

The Conventional Managed Portfolio Service gives clients access to the portfolio construction and risk management skills of abrdn's Discretionary Investment Management team.

In the initial stages of the investment process the Discretionary Investment Management team uses independent strategic asset allocation optimisation by Moody's Analytics. They combine this with tactical insights from abrdn's Multi-Asset Investing Team.

This analysis forms a framework for the Discretionary Investment Management team to select funds. They implement an agile, blended approach to fund selection. This approach utilises a blend of active and passive exposures, depending on the Investment Team's views of which asset classes are likely to offer scope for managers to outperform versus those where a lower cost solution is preferred. The fund selection process involves both quantitative research and qualitative research, including face-to-face meetings with fund managers. It also leverages the considerable expertise of the abrdn Multi-Manager Strategies team.

Investment Team

Darren Ripton Head of Investments Discretionary, abrdn

Darren Ripton assumed responsibility for the day-to-day investment process in 2009, after joining the company in 2007 as a Client Portfolio Manager. He has been integral to developing the fund selection and portfolio construction process that is used by the business. Darren has twenty years' investment experience, seven of which were spent managing discretionary mandates with ABN Amro Private Bank. His role there included the oversight of all investment funds used within mandates in London, Jersey and Gibraltar offices. He is a Chartered member of the Chartered Institute for Securities and Investment and holds a BSc from the University of Hertfordshire.

Jason Day Senior Investment Manager Discretionary, abrdn

Jason joined Standard Life Investments in 2011 as a senior analyst in the fund solutions team. In 2013 he was appointed as a senior investment manager for the company and is lead manager on the Conventional and Tailored Managed Portfolio Service, a range of risk targeted model portfolios. He has 25 years' experience of fund selection, asset allocation and portfolio construction and prior to joining SLI was responsible for the development, launch and management of a multi-asset class, multi-manager vehicle for Allenbridge Group plc.

Portfolio performance is based on abrdn MPS hosted on the abrdn WRAP platform.

The portfolio constituents and performance may vary on other platforms.
The portfolio has not been available on all platforms since inception.
