Funds

MyFolio Funds are split across distinct ranges and risk levels

Invested

£15.3bn

Amount now invested in MyFolio (as at 31 December 2024)

Why choose MyFolio?

A cost-effective outsourced solution that allows you to focus on supporting your client's investment objectives

A range of options to explore your client's risk profile and preferred investment style including their sustainable investment goals

Delivering a long-term solution to clients for more than fourteen years

Ongoing monitoring and rebalancing gives peace of mind that your client's risk and return objectives are being met

Comprehensive adviser support, including access to the Lookthrough reports to find the latest information and updates

MyFolio's range and breadth allows advisers to choose the fund most appropriate for their clients' needs.

Adviser guide

What is MyFolio?

MyFolio consists of a range of multi-asset, fund of funds, split into distinct ranges and risk levels (from lower risk through to higher risk). This extensive choice gives you the flexibility to choose a solution that meets your client's preferred investment style and attitude to risk. Choose from:

Index	Enhanced ESG Index	Market	Enhanced ESG	Core	Multi-Manager
5 portfolios investing only in passive funds managed by Aberdeen Investments (lowest-cost option)	5 portfolios investing in passive funds with sustainability characteristics managed by Aberdeen Investments	5 portfolios investing mainly in passive funds	5 portfolios investing mainly in funds with a sustainability characteristics mandate	5 portfolios investing in active and passive funds including external manager selection	5 portfolios investing in funds from a range of asset managers

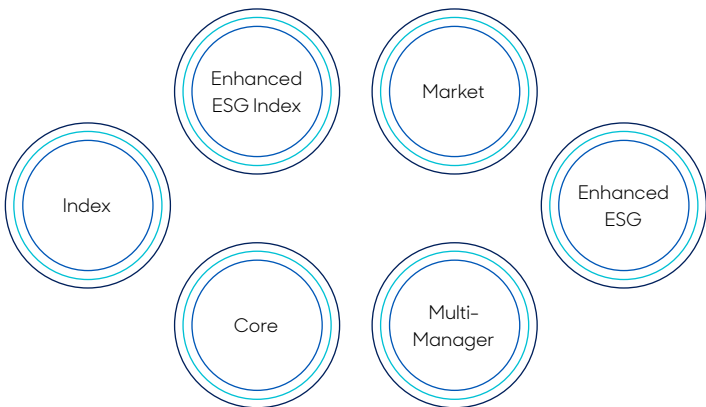

Choosing the right MyFolio fund

Deciding which portfolio is right for your client is a very straightforward process.

Choose the appropriate risk level, from lower to higher risk.

Choose a preferred investment style

What does MyFolio invest in?

Each MyFolio fund range invests in a mix of defensive and growth asset classes. Defensive assets include cash, government bonds, corporate and global index linked bonds. Meanwhile, growth assets encompass equities, high yield bonds, emerging market debt and property¹.

Defensive

Growth

As you move up the risk levels, you would typically expect to see a higher proportion of the portfolio invested in growth assets and less in defensive assets.

¹ MyFolio Index invests in real estate through Global Real Estate Investment Trusts.

Adviser guide

Building MyFolio in four steps...

Who manages MyFolio?

The responsibility for the MyFolio fund ranges lies across experienced portfolio managers, who are all part of the Multi-Manager Strategies Team.

Fund range	Portfolio manager(s)
Index, ESG Enhanced Index and Market	Justin Jones and Daniel Reynolds
Core and Multi-Manager	Katie Trowsdale and Robert Bowie
ESG Enhanced	MyFolio Investment Team

Key risks

The value of investments and the income from them can fall and investors may get back less than the amount invested.

The fund invests in securities which are subject to the risk that the issuer may default on interest or capital payments.

The fund price can go up or down daily for a variety of reasons including changes in interest rates, inflation expectations or the perceived credit quality of individual countries or securities.

The fund invests in equity and equity related securities. These are sensitive to variations in the stock markets which can be volatile and change substantially in short periods of time.

The fund invests in emerging market equities and / or bonds. Investing in emerging markets involves a greater risk of loss than investing in more developed markets due to, among other factors, greater political, tax, economic, foreign exchange, liquidity and regulatory risks.

Commercial property is less liquid than other asset classes such as bonds or equities. Selling property can be a lengthy process so investors in the fund should be aware that they may not be able to sell their investment when they want to.

Commercial property transaction charges are higher than those which apply in other asset classes. Investors should

be aware that a high volume of transactions would have a material impact on fund returns.

Property valuation is a matter of judgment by an independent valuer and is therefore a matter of the valuer's opinion rather than fact.

The fund may hold money-market instruments, the value of which may be subject to adverse movements in extreme market conditions.

The use of derivatives carries the risk of reduced liquidity, substantial loss and increased volatility in adverse market conditions, such as a failure amongst market participants. The use of derivatives may result in the fund being leveraged (where market exposure and thus the potential for loss by the fund exceeds the amount it has invested) and in these market conditions the effect of leverage will be to magnify losses.

The fund invests in high yielding bonds which carry a greater risk of default than those with lower yields.

The fund employs a single swinging pricing methodology to protect against the dilution impact of transaction costs. Due to the high transaction charges associated with the fund's assets, a change in the pricing basis will result in a significant movement in the fund's published price.

Important Information

The value of your investments, and the income from them, may fall or rise and investors may get back less than they invested. Past performance is not a guide to future results.

Please refer to the Key Investor Information Document or the Prospectus for more details of the risks applicable to each fund in the Aberdeen Investments MyFolio range, or ask your adviser. The Aberdeen Investments MyFolio funds are not managed to a particular benchmark. Aberdeen Investments has not considered the suitability of investment against your individual needs and risk tolerance.
