

Aberdeen Target Return MPS

Managed Portfolio Service

Monthly Performance Update – April 2025

This document is issued by the discretionary investment management area of Aberdeen, which has a separate legal entity, abrdn Portfolio Solutions Limited.

The Target Return Managed Portfolio Service (MPS) offers a range of five managed portfolio strategies.

The Target Return Managed Portfolio Service gives clients access to the portfolio construction and risk management skills of Aberdeen's discretionary investment management team. The team utilises independent strategic asset allocation advice from Moody's Analytics, combined with tactical insights from the Multi-Asset Investing Team at Aberdeen.

This approach utilises a blend of active and passive exposures, depending on the team's views of which asset classes are likely to offer scope for managers to outperform versus those where a lower cost solution is preferred. The fund selection process involves both qualitative and quantitative research, including face-to-face meetings with the fund managers. It also leverages the considerable expertise of the Aberdeen's Multi-Manager Strategies Team.

Portfolio performance is based on Aberdeen MPS hosted on the Aberdeen WRAP platform.

Please note that model portfolio constituents and performance may vary on other platforms.

Performance figures shown are net of the Aberdeen's discretionary management fee. However they do not include the deduction of product and adviser specific charges. The effect of these charges would be to reduce the performance levels shown. In addition, MPS portfolios are subject to fund level annual management charges, which vary over time in line with the composition of the portfolio.

The figures shown here refer to the past. Past performance is not a reliable guide to future performance. As with any investment, the value of your client's portfolio can go down as well as up and may be worth less than invested.
