

Aberdeen Standard Global Infrastructure Income Fund

October 2021 Performance Data and Portfolio Composition

Investment objective

The Fund's primary investment objective is to seek to provide a high level of total return with an emphasis on current income.

Investment strategies

The Fund seeks to achieve its investment objective by investing in a portfolio of income-producing public and private infrastructure equity investments from around the world.

Performance

The latest available performance figures have been calculated net-of-fees in U.S. dollars for the period ending October 31, 2021:

Total return as of October 31, 2021 ^A (%)

	Cumulative as of October 31, 2021			Annualized as of October 31, 2021		
	1 Month	3 Month	YTD	1 Year	3 Years	Since Inception 07/29/20
NAV	3.7	1.7	11.8	22.8	n/a	18.2
Market Price	5.6	1.0	19.2	36.1	n/a	9.7
S&P Global Infrastructure Net Total Return Index	3.6	4.0	10.1	27.9	n/a	17.8

^A Past performance is no guarantee of future results. Investment returns and principal value will fluctuate and shares, when sold, may be worth more or less than original cost. Current performance may be lower or higher than the performance data quoted. NAV return data includes investment management fees, custodial charges, bank loan expenses and administrative fees (such as Director and legal fees) and assumes the reinvestment of all distributions. The Fund is subject to investment risk, including the possible loss of principal. Returns for periods less than one year are not annualized.

Top Ten Equity Holdings^B (based on total assets)

Holding	%
Ferrovial, S.A.	3.2

^f Compositions are subject to change. Figures may not appear to sum due to rounding. The table summarizes the composition of the Fund's portfolio, expressed as a percentage of total assets.

Important risk disclosure

All performance shown is historical, assumes reinvestment of all dividends and capital gain distributions and does not guarantee future results. Investment return and principal value fluctuate with changing market conditions so when sold, shares may be worth more or less than that of the original cost. Total return based on market price reflects changes in market value. Total return based on net asset value reflects changes in the fund's net asset value during each period. Current performance may be lower or higher than the performance data quoted. This commentary is for informational purposes only, and is not intended as an offer or recommendation with respect to the purchase or sale of any security, option, future or other derivatives in such securities.

Closed-end funds are traded on the secondary market through one of the stock exchanges. The Fund's investment return and principal value will fluctuate so that an investor's shares may be worth more or less than the original cost. Shares of closed-end funds may trade above (a premium) or below (a discount) the net asset value (NAV) of the fund's portfolio. The Net Asset Value (NAV) is the value of an entity's assets less the value of its liabilities. The Market Price is the current price at which an asset can be bought or sold. There is no assurance that the Fund will achieve its investment objective. Past performance does not guarantee future results.

The information presented was prepared and issued by the Fund based on publicly available information, internally developed data and other sources believed to be reliable. All reasonable care has been taken to ensure accuracy.

Investment involves risk. The value of investments, and the income from them, can go down as well as up and an investor may get back less than the amount invested. Past performance is not a guide to future results.

International investing entails special risk considerations, including currency fluctuations, lower liquidity, economic and political risks, and differences in accounting methods; these risks are generally heightened for emerging market investments. Equity stocks of small and mid-cap companies carry greater risk, and more volatility than equity stocks of larger, more established companies. Dividends are not guaranteed and a company's future ability to pay dividends may be limited.

Infrastructure-related issuers may be subject to a variety of factors that may adversely affect their business or operations, including high interest costs in connection with capital construction programs, high leverage, costs associated with environmental and other regulations, the effects of economic slowdown, surplus capacity, increased competition from other providers of services, uncertainties concerning the availability of fuel at reasonable prices, the effects of energy conservation policies and other factors.

The Fund's investments in private companies may be subject to higher risk than investments in securities of public companies. Please read and carefully consider the full description of risks set forth in the Fund's prospectus.

Please see the Fund's most recent annual report for more information on risks applicable to the Fund.

Important information

Aberdeen Standard Investments Inc. has prepared this report based on information sources believed to be accurate and reliable. However, the figures are unaudited and neither the Fund, its investment adviser, nor any other person guarantees their accuracy. Investors should seek their own professional advice and should consider the investment objectives, risks, charges and expenses before acting on this information.

The S&P Global Infrastructure Index is designed to track 75 companies from around the world chosen to represent the listed infrastructure industry while maintaining liquidity and tradability.

Past performance does not guarantee future results.

Aberdeen is a U.S. registered service mark of Aberdeen Asset Management PLC.
