IMPORTANT INFORMATION

The abrdn Palladium ETF Trust, abrdn Platinum ETF Trust, abrdn Precious Metals Basket ETF Trust, abrdn Silver ETF Trust and the abrdn Gold ETF Trust are not investment companies registered under the Investment Company Act of 1940 or a commodity pool for purposes of the Commodity Exchange Act. Shares of the Trusts are not subject to the same regulatory requirements as mutual funds. **This Material must be accompanied or preceded by the prospectus. These investments are not suitable for all investors.**

Risks and Important Considerations

The value of the Shares relates directly to the value of the gold, silver, palladium and platinum held by the Trusts and fluctuations in the price of gold, silver, palladium and platinum could materially adversely affect an investment in the Shares. Several factors may affect the price of gold, silver, palladium and platinum, including: A change in economic conditions, such as a recession, can adversely affect the price of gold, silver, palladium and platinum. Gold, silver, palladium and platinum are used in a wide range of industrial applications, and an economic downturn could have a negative impact on its demand and, consequently, its price and the price of the Shares; Investors' expectations with respect to the rate of inflation; Currency exchange rates; Interest rates; Investment and trading activities of hedge funds and commodity funds; and global or regional political, economic or financial events and situations. Should there be an increase in the level of hedge activity of bullion producing companies, it could cause a decline in world prices, adversely affecting the price of the Shares. Also, should the speculative community take a negative view towards bullion, it could cause a decline in world gold, silver, palladium and platinum prices, negatively impacting the price of the Shares. There is a risk that part or all of the Trust's gold, silver, palladium and platinum could be lost, damaged or stolen. Failure by the Custodian or Sub-Custodian to exercise due care in the safekeeping of the precious metal held by the Trusts could result in a loss to the Trusts.

Commodities generally are volatile and are not suitable for all investors. Trusts focusing on a single commodity generally experience greater volatility. Since there is no limit on the amount of platinum and palladium that the Trust may acquire, the Trust, as it grows, may have an impact on the supply and demand of platinum and palladium.

Please refer to the prospectus for complete information regarding all risks associated with the Trusts.

An investment in the trust does not constitute a direct investment in the underlying metal.

ALPS Distributors, Inc. is the marketing agent for abrdn Gold ETF Trust, abrdn Silver ETF Trust, abrdn Platinum ETF Trust, abrdn Palladium ETF Trust and the abrdn Precious Metals Basket ETF Trust. abrdn or its affiliates are not affiliated with ALPS Distributors, Inc. Although Shares of the Trusts may be bought and sold on the exchange through any brokerage account, they are not individually redeemable directly from the Trust.

Investors may acquire Shares and tender them for redemption through the Trust in basket aggregation only.

Please read the prospectus carefully before investing. Please visit abrdn.com/usa/etf.

Options are not suitable for all investors. Diversification does not eliminate the risk of experiencing investment losses.

Investors buy and sell shares on a secondary market (i.e., not directly from the Trust). Only market makers or "authorized participants" may trade directly with the funds, typically in blocks of 25K to 100K shares.

Indices are unmanaged and one cannot invest directly in an index.

abrdn ETFs Disclosure

An investor should consider the investment objectives, risks, charges and expenses of the ETFs carefully before investing. To obtain a prospectus containing this and other important information, call 844-383-7289 or visit abrdn.com/usa/etf. Read the prospectus carefully before investing.

Fund Risk: There are risks associated with investing including possible loss of principal. Commodities generally are volatile and are not suitable for all investors. There can be no assurance that the Fund's investment objective will be met at any time. The commodities markets and the prices of various commodities may fluctuate widely based on a variety of factors. Because the Fund's performance is linked to the performance of highly volatile commodities, investors should consider purchasing shares of the Fund only as part of an overall diversified portfolio and should be willing to assume the risks of potentially significant fluctuations in the value of the Fund.

Through holding of futures, options and options on futures contracts, the Fund may be exposed to (i) losses from margin deposits in the case of bankruptcy of the relevant broker, and (ii) a risk that the relevant position cannot be close out when required at its fundamental value. In pursuing its investment strategy, particularly when rolling futures contracts, the Fund may engage in frequent trading of its portfolio of securities, resulting in a high portfolio turnover rate.

As a "non-diversified" fund, the Fund may hold a smaller number of portfolio securities than many other funds. To the extent the Fund invests in a relatively small number of issuers, a decline in the market value of a particular security held by the Fund may affect its value more than if it invested in a larger number of issuers. The value of Shares may be more volatile than the values of shares of more diversified funds.

During situations where the cost of any futures contracts for delivery on dates further in the future is higher than those for delivery closer in time, the value of the Fund holding such contracts will decrease over time unless the spot price of that contract increases by the same rate as the rate of the variation in the price of the futures contract. The rate of variation could be quite significant and last for an indeterminate period of time, reducing the value of the Fund.

Changes in the laws of the United States and/or the Cayman Islands, under which the Fund and the Subsidiary are organized, respectively, could

result in the inability of the Subsidiary to operate as intended and could negatively affect the Fund and its shareholders.

To the extent the Fund is exposed directly or indirectly to leverage (through investments in commodities futures contracts) the value of that Fund may be more volatile than if no leverage were present.

In order to qualify for the favorable U.S. federal income tax treatment accorded to a regulated investment company ("RIC"), the Fund must derive at least 90% of its gross income in each taxable year from certain categories of income ("qualifying income") and must satisfy certain asset diversification requirements. Certain of the Fund's investments will not generate income that is qualifying income. The Fund intends to hold such commodity-related investments indirectly, through the Subsidiary. The Fund believes that income from the Subsidiary will be qualifying income because it expects that the Subsidiary will make annual distributions of its earnings and profits. However, there can be no certainty in this regard, as the Fund has not sought or received an opinion of counsel confirming that the Subsidiary's operations and resulting distributions would produce qualifying income for the Fund. If the Fund were to fail to meet the qualifying income test or asset diversification requirements and fail to qualify as a RIC, it would be taxed in the same manner as an ordinary corporation, and distributions to its shareholders would not be deductible by the Fund in computing its taxable income.

Shares in the Trusts are not FDIC insured and may lose value and have no bank guarantee. Investors buy and sell shares on a secondary market (i.e., not directly from the Trust). Only market makers or authorized participants may trade directly with the funds, typically in blocks of 25K to 100K shares.

Please see the current prospectus (abrdn.com/usa/etf) for more information regarding the risk associated with an investment in the Funds.

ALPS Distributors, Inc. is the distributor for abrdn ETFs. ALPS Distributors, Inc. and abrdn are not affiliated entities.

In the United States, abrdn is the marketing name for the following affiliated, registered investment advisers: abrdn Inc., Aberdeen Asset Managers Ltd., abrdn Australia Limited, abrdn Asia Limited, Aberdeen Capital Management, LLC, abrdn ETFs Advisors LLC and Aberdeen Standard Alternative Funds Limited.
