MARKET AND CREDIT RISKS	
 The Sub-Fund may be exposed to Interest Rate Risk and Credit Risk. The Sub-Fund's underlying investments are subject to interest rate risk and credit risk. Interest rate fluctuations affect the capital value of investments. Where long-term interest rates rise, the capital value of bonds is likely to fall and vice versa. Credit risk reflects the ability of a bond issuer to meet its obligations. The Sub-Fund may be exposed to Emerging Market Risks. The Sub-Fund invests in Emerging Markets which tend to be more volatile than mature markets and its value could move sharply up or down. In some circumstances, the underlying investments may become less liquid which may constrain the Investment Manager's ability to realise some or all of the portfolio. The registration and settlement arrangements in Emerging Markets may be less developed than in more mature markets so the operational risks of investing are higher. Political risks and adverse economic circumstances are more likely to arise. The Sub-Fund may also invest in Frontier Markets which involves similar risks, but to a greater extent since they tend to be even smaller, less developed, and less accessible than other Emerging Markets. 	
 The Sub-Fund is not listed and you can redeem only on a Singapore business day 	
 which is also a Dealing Day. The Company may refuse any redemption requests if all relevant documentation has not been submitted, if such redemption would result in non-compliance with the Minimum Holding requirement, or in any other circumstances agreed with the Sub-Fund and notified to you.
