Frequently asked questions

1. Why don't my client valuations reflect today's prices?

Your bulk valuation file is generated by the Elevate platform at 6am. This will be before the day's investment price feed (usually 8am). Therefore the bulk valuation file will use the last known price from 8am the previous working day.

2. How do I differentiate between tax years on my client's ISA?

Currently there is no way to differentiate between tax years through the bulk valuation function. However, an ISA allowance report is available through the Elevate platform, which documents your client's ISA allowance usage for current and previous years.
